

The **Gospel** *that*

Samantha Young

CHRISTIAN LIGHT
PUBLICATIONS

For Emmaus,

who at two years old asked me to
write a “God truck book.”

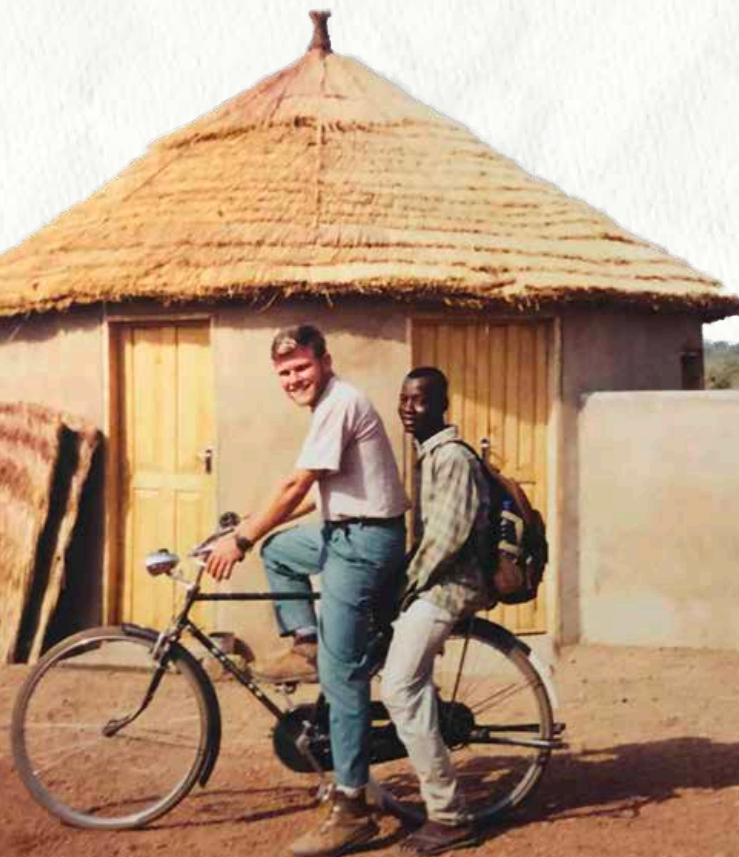

A *is for . . .* **Airplane**

Airplanes fly missionaries and supplies to villages high in the mountains. These airplanes sometimes become ambulances, taking hurt people to a hospital.

B is for ... **Bicycle**

Some missionaries don't have cars to drive from village to village to tell others about Jesus. Bicycles can help them travel farther to do their important work.

C *is for . . .* **Cargo Ship**

Many people pack boxes full of food, blankets, and clothes to send to the poor. The packed boxes are loaded into a shipping container. Then they're put onto a cargo ship for the journey across the ocean.

D is for ... **Drill Rig**

In poor countries, people may have to walk for miles to get clean water. It's easier to drink dirty water, which makes them sick. Drill rigs drill wells to get clean water.

E is for . . . **Emergency Hospital Truck**

People who work for mobile hospitals travel to places that need help. They can do surgeries, take X-rays, and even fill cavities.

F *is for ...* **Forklift**

A forklift is used to load shipping containers. It lifts heavy wooden pallets that are stacked with boxes of Bibles or rice and beans for needy families.

C *is for...* **Gospel Truck**

Have you ever seen a Gospel message on a semi?
As truckers drive their routes, many people get to read
God's truth.

H *is for . . .* **Helicopter**

Because helicopters don't need a runway, they can land on steep mountains. They save missionaries miles of travel on narrow footpaths.

I is for . . . **Intermodal Transport**

Trucks, trains, and boats work together to bring boxes across the ocean. Each kind of transportation helps take the supplies right to the people who need them.

J *is for . . .* **Jeep 4x4**

God's workers often use four-wheel drive vehicles like Jeeps to drive on rough roads. This vehicle can carry several people as well as supplies.
